Dear Congress,I feel that banning services by companies is unconstitutional. Its our right as consumers to decide where we get our news/weather/entertainment from! If the local radio/news/weather staions stink and are laden down with commercials (esp. from politicians) its our right to have a CHOICE! That what America was founded on, the ability and the freedom to chose! Don't start taking away our rights because some big companies are upset they are losing profits, make them change to meet consumers needs! Concern yourself with the budget, our soldier dying in Iraq, the homelss people starving on the street and schools that can't even afford pencils, not XM Radio.
